FOCLASA 2014 (http://foclasa.lcc.uma.es/) is a workshop collocated with the 25th International Conference on Concurrency Theory (CONCUR 2014, http://www.concur2014.org/). The goal of the FOCLASA workshop is to put together researchers and practitioners to share and identify common problems, and to devise general solutions in the context of coordination languages and self-adaptive systems.

Important Dates

<tr>
<th>Date</th>
<th>Event</th>
</tr>
</thead>
<tbody>
<tr>
<td>11 June 2014</td>
<td>Notification</td>
</tr>
<tr>
<td>18 June 2014</td>
<td>Deadline for abstract submission</td>
</tr>
<tr>
<td>15 June 2014</td>
<td>Deadline for paper submission</td>
</tr>
<tr>
<td>22 June 2014</td>
<td>Deadline for paper submission</td>
</tr>
<tr>
<td>13 July 2014</td>
<td>Notifications</td>
</tr>
<tr>
<td>23 July 2014</td>
<td>Final versions</td>
</tr>
<tr>
<td>6 September 2014</td>
<td>Workshop in Rome</td>
</tr>
</tbody>
</table>

Topics of Interest

- Theoretical models and frameworks for component and service coordination, service composition, service adaptation and concurrent system modeling.
- Applications and usability studies for the aforementioned theoretical models, interaction and coordination challenges in decentralized self-adaptive systems and various application domains.
- Languages and specification protocols for component and service interaction, their semantics, expressiveness, validation and verification, type checking, static and dynamic analysis.
- “Software as a Service” models (e.g., cloud computing) and dynamic software architectures, such as self-adaptive and self-organizing systems.
- Tools and environments for the development of concurrent and customizable self-monitoring, self-adaptive and self-organizing applications.
- Formal methods for self-adaptive systems, stochastic modeling and analysis, reasoning under uncertainty, run-time synthesis.

In particular, practice, experience and methodologies from the following areas are solicited as well:

- Cloud computing
- Service-oriented computing
- Component-based systems
- Grid computing
- Large-scale distributed systems
- Multi-agent systems
- Peer-to-peer systems
- Business process modeling
- Survey works analysing and comparing literature on the topics of FOCLASA are also welcome.

Paper Submission

Submissions must describe authors' original research work and their results. Description of work-in-progress with concrete results is also encouraged. The contributions should not exceed 15 pages in the EPTCS style (http://style.eptcs.org/) and should be submitted as Portable Document Format (PDF) files using the EasyChair submission site:

http://www.easychair.org/conferences/?conf=foclasa2014

Submitting an abstract does not put any obligation on the authors to submit a full paper. Abstracts without an accompanying full paper by the paper submission deadline are automatically considered withdrawn. The authors are, however, encouraged to explicitly withdraw their abstract, if they decide not to submit a full paper. All submissions will be reviewed by an international program committee who will make a selection among the submissions based on the novelty, soundness and applicability of the presented ideas and results. Concurrent submission to other venues (conferences, workshops or journal) and submission of papers under consideration elsewhere are not allowed. A printed version of the proceedings will be distributed among participants during the workshop. The proceedings of the workshop will be published as a separate volume.

Program Committee Chairs

- Javier Cámara
  Institute for Software Research
  Carnegie Mellon University, USA
  jcmorenol@cs.cmu.edu
- José Proença
  iMinds-DistriNet, KU Leuven, Belgium
  HASLab/INESC TEC, University of Minho, Portugal
  jose.proenca@cs.kuleuven.be

Publicity Chair

- Sung-Shik Jongmans, Leiden University & CWI, The Netherlands

Program Committee

- Antonio Brogi, University of Pisa, Italy
- Carlos Canal, University of Málaga, Spain
- Javier Cámara, Carnegie Mellon University, USA
- Carlos Cuesta, Rey Juan Carlos University, Spain
- Keijiro Heljanko, Aalto University, Finland
- Rogério de Lemos, University of Kent, UK
- Natalia Kokash, Leiden University, The Netherlands
- Christian Krause, Hasso Plattner Institut, Germany
- Antonía Lopes, University of Lisbon, Portugal
- Sun Meng, Peking University, China
- Liliana Pasquale, University of Limerick, Ireland
- Pascal Poizat, Paris Ouest University and LIP6, France
- José Proença, KU Leuven, Belgium
- Gwen Salaün, Grenoble INP - INRIA Grenoble - LIG, France
- Bradley Schmerl, Carnegie Mellon University, USA
- Marjan Sirjani, Reykjavik University, Iceland
- Carolyn Talcott, SRI International, USA
- Francesco Tiezzi, IMT Lucca Institute for Advanced Studies, Italy
- Mirko Viroli, University of Bologna, Italy

Steering Committee

- Farhad Arbab, CWI, The Netherlands
- Antonio Brogi, University of Pisa, Italy
- Carlos Canal, University of Málaga, Spain
- Jean-Marie Jacquet, University of Namur, Belgium
- Ernesto Pimentel, University of Málaga, Spain
- Gwen Salaün, Grenoble INP - INRIA Grenoble - LIG, France
